EOL Notice - Pantera Switch

January 16, 2023

Overview

In 2023, due to parts obsolescence, Great River Technology is discontinuing the Pantera switch. To support customer needs for additional units, Great River will manufacture a final build of modules in mid-2023 and will offer a lifetime buy to existing customers.

Description & Parts Affected

All Pantera switch configurations will be discontinued. This includes all part numbers beginning with: PA-A8 and PB-A8 (For example: PA-A8-44-08-1X-00, PB-A8-44-08-1X-00 or PA-A8-08-4X-00). Due to limited inventory levels and product EOL, all sales of Pantera Switches that require a data rate of 4 Gbps will be limited to a first come first serve basis. Once stock levels are depleted, no further orders will be fulfilled.

For most customer applications, Pantera switches may be replaced by Techway's 10x10 Spider switch. The table below indicates discontinued part numbers and their possible replacements.

Pantera Base P/N	Possible Replacement	Comments
PA-A8-44-03	Techway Spider	
PA-A8-44-08	Techway Spider	

Key Dates and Ordering Information

Final guaranteed orders will be accepted until August 1st, 2023. After this date, orders will be accepted until stock is exhausted.

Contacts

For international customers, please contact your local distributors:
